

# CURAÇAO EGAMING

**EGAMING SERVICES SINCE 1996**

## STEP 1

Submit a request for our eGaming Licensing Services Guide and Application Forms. After receiving our Services Guide, your response to the questions outlined in point 7 are required. This information will provide our compliance advisors with a detailed overview of your planned or existing eGaming business activities and assist us to define your eGaming Licensing Service compliance requirements. We are happy to schedule a phone consultation to discuss your requirements at length.

## STEP 2

Remit the Application Fee and return an electronic copy of the completed application pack along with all required supporting documents for processing to begin. Should you elect to create and utilize the benefits of a specialized Curaçao eZone company, fiduciary services will be provided by an authorized corporate trust services provider. All original completed forms and required supporting documents should be sent to us via courier.

## STEP 3

Our technical compliance team will review for approval your eGaming Application. Upon approval by eGaming Licensing Authority our official licensing seal representing the services authorized under the license will be provided to you for display on your web site(s). Our eZone & eGaming laws require that specific components of your eGaming service must operate under our authority. This process on average takes 4-6 weeks to complete.

We have outlined for you the general process in which eligible applicants obtain eGaming Licensing approval for Curaçao. To engage in the licensing process kindly begin by reviewing our eGaming Licensing Services Guide while providing a response to the items under point 7 in the Guide. Your answers to these questions will provide our technical compliance team with a detailed overview on the services intended to operate under our authority. After our review we will advise you which services will need to operate under our authority for technical compliance purposes. An example of such services may include control of specific traffic, data, events, functions or contributing services as outlined in the Licensing Guide. Available technical methods offered to accommodate our Jurisdictions technical compliance requirements include: Ezone Co-location, Dedicated Servers, Access to our Global Private Performance Platform (which provides an array of independent services built upon our globally distributed private platform). Services available on our Private Global Platform are: Cloud Acceleration, Content Delivery, Cloud IPS/Firewall, Global Load Balancing, Mission critical DNS and Private Cloud Data Storage. Our technical compliance services may be combined and/or layered over any existing operation no matter where those services may presently be operating. These services provide you the operator or service provider technical and operational compliance flexibility and global service performance enhancements.

Our application pack will be supplied. The Application Pack contains the required forms and instructions necessary to apply for Curaçao eGaming Licensing approval. Separate applications may be supplied to establish a specialized Curacao eZone company or a company in another jurisdiction e.g. a BVI. Curacao company formation and fiduciary services will be provided by our authorized corporate trust services provider which operates under the direct supervision of the Central Bank of Curaçao. Required forms and supporting documents are to be completed and returned for processing via courier or in person. A soft copy may be emailed to us in advance to begin the process.

# CURAÇAO EGAMING

**EGAMING SERVICES SINCE 1996**

## **eGaming Total Solution Jurisdiction**

What Curaçao offers is not duplicated in other countries. Exactly what separates Curaçao from other jurisdictions? Simply put technology, specialized eGaming licensing services, fiscal benefits, internet infrastructure, legislation stability and a longstanding history of regulating land-based casinos. A unique relationship exists between the private sector and Government which is also owner of the International Telecom providing both Internet and International telecommunications to all of the Caribbean Dutch Antilles Islands. Our ability to provide eGaming, eZone co-location services within the Government International Telecom facilities is unique and not duplicated elsewhere.

## **Over a decade of experience**

As one of the oldest and most politically stable providers of regulated eGaming Licensing we have been recognized as a historical frontrunner in accommodating the International eGaming world. Since the early '90's our jurisdiction has provided eGaming Licensing authority and specialized eZone co-location services for eligible applicants. Our legislation and tax regime have favored eGaming companies for over a decade, our legal system is European-based common-law as part of the Kingdom of the Netherlands.

## **No need to apply for various Licenses**

Curaçao offers only one eGaming License type which covers operators of services, software providers and network providers. Our jurisdiction's License covers games of skill, chance and sports betting. Special Licensing Services are available.

## **Specialized eGaming Licensing Services**

We offer specialized eGaming Licensing programs which provide Licensing Authority for various eGaming services. Please review our **eGaming Licensing Guide** for additional information.

## **Tax benefits while operating from the eZone**

Curaçao offers an attractive environment for International ecommerce activities. Via the internet, electronic commerce can be performed on computer hardware located in the government eZone, providing benefits such as a net corporate income tax rate of only 2%, 0% tax on Gross Bets, no import duties, no sales (turnover) tax. We do not have VAT in Curaçao and dividend withdrawals are not restricted.

## **Global Private Cloud Performance Platform**

A unique array of solutions built on our globally distributed private cloud network platform that boasts Co-location, Dedicated Servers, Virtualized Servers, Acceleration, Content Delivery, Cloud IPS/Firewall, Global Load Balancing as well as Global DNS. Take control of the way your eGaming service is delivered and close the gap between technical, legal and jurisdictional issues.

## **Directly connection to the International Telecom**

We completely bypass transit networks eliminating cross connections or local infrastructures all of which are possible points of problems, shortening the network path between your IT infrastructure and the world. The result is lower latency, maximum speed and unsurpassed reliability - a service offering not found elsewhere. Our unique eZone location and over a decade of experience completely set us apart from other Jurisdictions and providers.

## **Innovative solutions for industry challenges**

We have strategic alliances with leaders in the industry offering financial intermediary services for merchant accounts, payment gateways, corporate and personal bank accounts. Our strong legislation with regard to money laundering and KYC (Know Your Customer) meets or exceeds worldwide requirements and standards. Our stability as a well-recognized financial center dates back to World War II. Curaçao is white-listed on the OECD.

## **All-Inclusive packages**

We offer all-inclusive packages to qualified applicants. All-inclusive packages include eGaming License and technical compliance services.
